GRADUATION TASSEL COLORS

Tassels are used to symbolically illustrate the exact moment of graduation. During the ceremony, graduates shift the location of their tassel from one side to the other, representing the formal completion of study. Because the tassel has long been such a significant instrument in the graduation process, it remains one of the most popular keepsakes chosen by graduates to commemorate this event. Tassels may be ordered in one, two or three color combinations.

We make every effort to reproduce the colors in this brochure accurately. However, the printed color may not exactly match the actual tassel color.
